the nab needs to help themselves by making the radio companies that they represent and make them better and more accessible to others that dont have xm or other satellite radio companies. i am paying for this service and dont want government intervention for something that i am paying for. for the other that are receiving radio signals free on fm or am they need to talk with the program managers and other personnel that they want a better service. as a paying customer i should be allowed to get the information that i want and not be given a choice. that is unamerican. please reject the current NAB's petition 04-160. xm radio is a service paid by me for me to use.
